Author of the Sprinter’s Compendium
Basic Sprint Training Lingo and Terms

• Speed Development- Acceleration is developed first, followed by Maximum Velocity
• Speed Endurance- ability maintain near max velocity
• Lactate Tolerance- AKA Lactate Threshold; the ability to buffer the acid build up in muscle tissue due to high level physical activity (time & intensity dependent)
• Stride Length and Stride Frequency
Defining the Event

• 100m dash relies heavily on Speed Development-initial explosion & acceleration, Max Velocity, somewhat speed endurance

• Usain Explains-https://youtu.be/yLWejYWjANM
Acceleration Blocks

• Foot Placement 1.0
  – Which foot goes in front?
    • Thumb Test
    • Arm Test
    • Push Test

• Foot Placement 2.0
  – Block Placement?
    • Front peddle two from the start line
    • Back peddle three from the start line
    • Narrow or Wide Feet in the Blocks?
Acceleration Block Clearance

• Having a routine into the blocks
  – Number of prerace starts and taking advantage of Post Activation Potentiation
  – Breathing Control (out and in blocks)

• Block Clearance
Acceleration Drive Phase

- Push, PUSh, PUSh, **PUSH**!
  - Don’t rush
  - Running away from the blocks

- March Madness Block Start Tournament
Acceleration and Drive Phase Drills

• Arm Split from a Start position- https://youtu.be/oqnBJ5dRDSs
• Standing Long Jump w/weight vest- https://youtu.be/K4cVBz8tUEE
• Latif Hurdle Pushes- https://youtu.be/OKMbJ5GsdF8
• Sled Pulls- https://youtu.be/XGnrGHBdWY
Transition Phase

• Progression
  – Not all at once
  – Eyes moving farther down the track
  – Heel Recovery getting higher each step
  – Sling shot

• Race Modeling
  – Cones for land marks
  – Once you are up your up
Transition Phase Drills

• Standing Falling Start- https://youtu.be/JdF8aRVoaPs
• Bench Drop- https://youtu.be/NTDEXyK9kG8
• Bullet Belt Contrast runs- https://youtu.be/sl53f_3Dbh8
• Mid position Medicine Ball Toss- https://youtu.be/B_Un1Rd3pJs
Maximum Velocity

• Posture
  – Styles should be limited
  – Commonalities
    • Front Side Mechanics, Heel Recovery, and Dorsiflexion

• Stride Length vs. Stride Frequency
  – Plyometric Training, Cued runs, and Drills biomechanics

• Dynamic Stereotype
  – In and Outs, Over Speed Work.
Drills for Maximum Velocity

• Cued intervals “A” Run-
  https://youtu.be/hqk7hKYlXXs

• Mini Hurdle Run-
  https://youtu.be/a8CeJb8u_C4

• Single Leg Hops-
  https://youtu.be/5ltdЕ_νDhNs

• Build, Float, Hit-
  http://speedendurance.com/2014/03/25/acceleration-and-maximum-velocity/
Speed and Special Endurance

• Speed Reserve

• Repeatable Performances
  – Preparing for the structures of competition

• Energy system development
  – Tolerance

• Special Considerations
  – Hamstring or Quadriceps Centric
  – A drill to help you evaluate [https://youtu.be/Qa9pRtr8sTw](https://youtu.be/Qa9pRtr8sTw)

  – Training and Injury history
Examples of Speed and Special Endurance Workouts

Short to Long vs. Long to Short

http://speedendurance.com/2015/12/14/long-to-short-or-short-to-long-comparing-contrasting-different-training-models/

Ladders

Lactacid: SpE Ladder Short
1x60 at 95%+ [full]
1x80 at 95%+ [full]
1x100 at 95%+ [full]
1x120 at 95%+ [full]

Tempo

8x200 + After each exercise with run on track: 20xPushups, 16xCrab Kicks, 40xCrunches, 20xSideUps, 40xLunges, 80xA-Skip, 40xChinnies, 20xPushups

Lactaid Stacking

1x150 Run @ 90% [45"]
4x40 Run @ 90% [40", 60"]
1x150 Run @ 90% [12']
1x150 Run @ 90% [45"]
4x40 Run @ 90% [40", 60"]
# How to Plan the Week?

**Short Sprinters 100/200 (no meet)**

<table>
<thead>
<tr>
<th>Monday</th>
<th>Acceleration and Maximum Velocity.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tuesday</td>
<td>Tempo (longer interval)</td>
</tr>
<tr>
<td>Wednesday</td>
<td>Active Recovery, Visualization, Goal Setting</td>
</tr>
<tr>
<td>Thursday</td>
<td>Race Modeling Special Endurance</td>
</tr>
<tr>
<td>Friday</td>
<td>Tempo (short interval)</td>
</tr>
<tr>
<td>Saturday</td>
<td>Speed Endurance I</td>
</tr>
</tbody>
</table>
